is pleased to invite you to the CME on

*P2P : Protocol to Publishing in  
Medical Sciences"*

**September 4 and 5, 2015**

## Introduction

In the broadest sense of the word, the definition of research includes any gathering of data, information and facts for the advancement of knowledge. Research is a process of steps used to collect and analyze information to increase our understanding of a topic or issue. It consists of three steps: pose a question, collect data to answer the question and present an answer to the question.

This CME is targeted towards the postgraduate students of medical sciences who are in the process of designing a protocol or publishing their research.
